To Whom So Ever It May Concern

This is to certify that M/S Energy Solution Labs Pvt. Ltd. (100% subsidiary of M/S Rishabh Instruments Pvt. Ltd. - Nashik) have successfully implemented the solution architecture since July 2015 with the Energy Management System (EMS) "MARC" software as per the requested requirements. The customized software with integration of third party meters and using plant's existing LAN infrastructure saved a big amount of cabling requirement and made all electrical dept. efforts free from gathering energy data and making desired reports.

Using the MARC system, we have identified the energy saving opportunities along with its tracking system after corrective action towards energy efficiency. MARC helped us to reduce man hours for collecting energy data from whole scattered plant and utilized the same in other productive works in the plant and maintenance.

The EMS team is very much prompt to give support whenever required after sales. We recommend this product for EMS requirement in industries.

Thanking you,

Mr. Ravindra Rade  
Deputy Manager
