TO WHOMSOEVER IT MAY CONCERN

This is to certify that M/s Rishabh Instruments have successfully implemented Energy Management Software and working satisfactorily in our company since from last 6 months. Till today we have extended the RishEMS up to 64 nos of Energy Meters (various Rishabh make MFMs) and could monitor all critical parameters at any point of time. Also the reports generated are very useful to monitor any variations/breakdowns and we can take necessary steps to solve the issues. The monitoring is highly accurate and very fast.

After implementation, we realized that there is some problem with Rectifier Transformer load and after some modification in the panel connection, we achieved the improvement in Power Factor parameter. This is just because of monitoring system "RishEMS". Like this it helps us to monitor and take steps for energy conservation in case of any deviation of parameter reading.

In the present power crisis, close monitoring of all critical Energy parameters play an important part and M/s Rishabh instruments have designed the meter, software and communication of all the parameters from energy meters to fetch in the system. Also reports are generated to fulfill our needs.

We express our sincere thanks to Rishabh Engineers (Mr.Kundan, Mr.Prashant and Mr. Mohanraj) for their guidance and support in the implementation of EMS. Also we get their immediate after sales prompt support whenever required in case of any clarifications and minor issues.

We recommend M/s Rishabh Instruments for Meters and EMS implementation required by any company.

Thanking you,  
Your Sincerely,

S. Devarajan,

Consultant Engineer –Electrical,
