TO WHOM SO EVER IT MAY CONCERN

This is to certify that M/s. Rishabh Instruments Pvt. Ltd. has successfully completed the installation of Rishabh Energy Management System (RISHEMS) at Taj Umaid Bhawan Palace, Jodhpur and we are able to get the following benefits from it:

- Online monitoring and trending of electrical parameters of each feeder
- Monitoring of Single Line Diagram
- Generate Reports in various formats including hourly, shift-wise and monthly formats, along with the feeder-wise TOD report
- Historical trending of various feeders

The trends and reports in RISHEMS are very much helpful in monitoring and analyzing the behavior of electrical parameters and consumption pattern of various feeders in the plant to bring down energy consumption and controlling energy cost.

Yours sincerely,

Mr. Ved Prakash Sharma
Chief Engineer
