To Whomsoever It May Concern

This is to certify that M/S Energy Solution Labs Pvt. Ltd - ESL (100% subsidiary of M/S Rishabh Instruments Pvt. Ltd. - Nashik) has successfully implemented the Energy Management System (EMS) at our Navin Fluorine Limited - Surat plant.

Since Aug 2013, ESL has deployed **MARC system** to monitor energy meters installed on main incomer panels and main feeders. Using MARC, we can monitor each feeder status along with its energy consumption pattern. The analytics offered in the MARC system is very useful for getting actionable alerts towards energy conservation. A custom developed report gives insights of the power consumption pattern made in every 15 minute blocks of a day which helps us to bid for next day power bidding on energy exchange process on IEX portal. Along with this analysis, we can identify the department wise energy uses along with energy leakages if any on daily basis using demand controlling facility in MARC.

Support after sales receiving from ESL team is also appreciable. We recommend ESL products and services for such monitoring requirement.

Thanking you,

Mr. Laxmikant Pisolkar
