To Whomsoever It May Concern

This is to certify that **M/S EnergySolution Labs Pvt. Limited** (100% subsidiary of **M/S Rishabh Instruments Pvt. Limited - Nashik**) have successfully implemented the Energy Management System (“**MARC.Desktop**”) solution in the month of Nov 2019 for the Solar Power plant monitoring project requirements at **Indian Space Research Organization (ISRO)** in the tender project (IPRC/CMG/TS/e-17/MI/ELE-09/2018-19/163 Dtd: 04.03.2019/11.03.2019) executed successfully by us M/s Bharathi Solar Technologies - Chennai.

MARC.Desktop software customized as per the our requirements for Weather station parameters, Solar Inverter parameters along with electrical parameters using Energy meter devices. MARC.Desktop enables us as electrical dept. to gather energy generated data, energy consumption data along with site temperature, wind speed and Solar Irradiation data on single screen for better analysis. This offers us to track the solar plant and inverter efficiency realtime.

Using the MARC system, I can show track of ROI along with ensuring payback periods to end customer. Also the data gives us insights of realtime pattern to take corrective action in case power generation goes below expected rating.

The ESL team is very much prompt to give support whenever required after sales. We recommend the ESL products and services for EMS requirement in industries.

FOR BHARATHI SOLAR TECHNOLOGIESy,
