

RISH DELTA VAF NX With Touch Key

RISH DELTA VAF NX

RISH Delta VAF measures important electrical parameters in 3 phase 4 wire, 3 phase 3 wire, 1 phase 2 wire and 1 phase 3 wire (split-phase) network. It displays many parameters at a glance. It measures electrical parameters like Voltage, Current, Frequency and Power Factor. The instrument has one optional built in relay output which can be configured as limit output. MODBUS RTU over RS-485 is built in for remote monitoring and configuration.

Product Features:

True RMS measurement:

The instrument measures distorted waveform up to 15th harmonic

Front panel keys:

Two keys are useful for easy setup navigation and changing. setup parameters

Storage of parameters:

▶ The instrument stores minimum and maximum values of System Voltage, System Current. Also Run Hour, ON Hour number of AUX interrupts are stored.

Display:

- ▶ 3 Line, 4 Digit bright Red LED display and indication LEDs
- Display can be configured for automatic scrolling of parameters or manual scrolling through keys as per requirement and application of user.

On site programmable:

It is possible to program primary, secondary of external potential transformer (PT) & primary, secondary of external current transformer (CT) ,Autoscroll via front panel keys and MODBUS.

MODBUS (RS485) Output:

- Rs485 output enables the instrument to transmit all the Measured parameters over standard MODBUS protocol
- ▶ The instrument can be configured baud rate, Device address via Keys and MODBUS communication.

Limit (Alarm) Output:

- ▶ Potential free 1NO contact
- Fully configurable trip point, hysteresis, on and off delays for Limit Output operation.

Compliance to International Safety standards:

▶ Compliance to International Safety standard IEC 61010-1:2017

Auxiliary supply:

- ▶ Higher Auxiliary power supply with voltage range 60V-300V AC/DC.
- ▶ Lower Auxiliary power supply with voltage range 20V-60V AC/DC.

EMC Compatibility:

▶ Compliance to International standard IEC 61326

Electrical Connection:

a) 3 Phase 4 Wire

It is recommended that the wires used for connections to the instrument should have lugs crimped at the end. That is, the connections should be made with Lugged wires for secure connections.
