Application

The purpose of the RISH CON SI-102 is to electrically isolate input, outputs and power supply. The isolator fulfills all requirements and regulation concerning electromagnetic compatibility EMC and safety (IEC61326-1 and IEC 61010-1:2010).

The device has one input and provides two independent outputs in an extremely small space.

Product Features

Electric Isolation

- Two electrically isolated analog outputs prevent interference voltage and current. Solves grounding problem in meshed signal networks.
- High electric isolation between input and outputs – 2.3 kV, and power supply versus all other circuits – 3.0 kV.

Function

Simple dc isolator serves to electrically isolate input dc signal in the range 0 – 20 mA or 4-20 mA or 0-10V or 2-10V is then converted to signal 0 – 20 mA or 4-20 mA or 0-10V or 2-10V.

Features

- Electric isolation between input, outputs and power supply. Prevents false measurement due to spurious potentials.
- Processes live zero signals, provision for signal conversion. Green LED signals indicates device in operating condition.
- Electrical insulation between power supply versus all other circuits
- 3.0 kV, and between input and outputs -2.3 kV.
