The secondary of external Potential Transformer (PT) can be programmed on site from 100VLL to 500VLL using front panel keys.

#### User selectable 3 phase 3Wire or 4Wire or Single phase Network

User can program on site the network connection as either 3 Phase 3 Wire or 4 Wire or single phase network using front panel keys.

In case of self powered Rish Delta only either 3 Phase 4 wire or single phase network are available.

#### Storage of parameters possible

The instrument stores minimum and maximum values for System Voltage, System Current, Run Hour, ON Hour & number of Interrupts. Every 60 sec stored values are updated.

#### Four function keys:

Using the four function key, it is possible to go desired parameter screen instantly.

#### Onsite selection of Auto scroll / Fixed Screen

User can set the display in auto scrolling mode or fixed screen mode using front panel keys.

#### Low back depth:

The instrument has very low back depth (behind the panel) of less than 55mm (without output options).

#### True RMS measurement

The instrument measures distorted waveform up to 15th Harmonic.
