## Overview :

RISH EC21XX is a modern Single Phase CT Connected Energy Meter designed for intended use in residential, commercial and light industrial Electrical Energy Metering. The meter is engineered using advanced microcontroller technology and is suitable for electrical parameter measurement and monitoring in 1 Phase 2 Wire Networks. The meter is available in 1A or 5A Nominal current measurement on external CT connection. It supports Tariff Counters selectable via MODBUS or MBUS Communication or Tariff input. It displays parameters on bright intuitive LCD and also has Pulse Outputs and Impulse LED for energy monitoring. It has inbuilt industry standard MODBUS RTU or MBUS for remote monitoring. Meter housing is standard Din Rail Mount that allows ease of installation.

## Product Features :

### CT Connected Meter :

The Meter can measure 1A or 5A current through external CT connection, which is on-site configurable enabling the meter to used for different measuring range using same unit. Meter is also self-powered thus offer simplified connections.

### Measured Electrical Parameters :

The Meter is primarily for bidirectional Active, Reactive and Apparent Energy measurement but it also accurately measures important electrical parameters like Voltage, Current, Frequency, Active, Reactive and Apparent Power, and Power Factor in Single Phase Networks. The measured parameters can be viewed on display and MODBUS or MBUS for remote viewing.

### Demand :

The Demand parameter for Active Power (Import/Export), Reactive Power (Import/Export), Apparent Power and Current are calculated as per configurable Demand Integration time.

### Pulse Outputs ( Optional ) :

The Meter has two opto-isolated Pulse Outputs (SO) that can be configured for any one of the Active (Import/Export), Reactive (Import/Export/Inductive/Capacitive) Energy parameter. The pulse width and rate of pulse out is onsite programmable.

### Impulse LED :

The meter has Impulse LED which flash at rate of 1000 IMP/kWh indicating the Active Energy consumption.

### LCD :

The LCD has bold seven segment digits with bright white backlit for display of measurement parameters. Special symbols, units and bar graph are provided for effective display and easy onsite configuration. Indications for communication status, active tariff, pulse outputs are available on screen. Measurement screen can be set as automatic scrolling or manual scrolling.

### Front Keys :

Two keys are provided for easy navigation and accessibility of different parameters and onsite programming of the meter.

### Remote Communication ( Optional ) :

The Meter provides communication based on MODBUS or MBUS protocol for remote data acquisition of measurement data and configuration. MODBUS and MBUS parameters baud rate, device address and parity- stop bits are programmable.

### Tariff Input ( Optional ) :

The meter has one Tariff Input dedicated for selection of active tariff T1 and T2. The opto-isolated Tariff Input is rated for a wide range of AC/DC voltage for operation.

### Dual tariff :

The meter has Tariff Counters for energy accumulation which are selectable via Tariff Input and via MODBUS or MBUS Communication. Energy for tariff are Active Energy (Import/Export/Total), Reactive Energy (Import/Export/Total) and Apparent Energy.

### On-Site Programmable CT Ratios :

It is possible to program Primary and secondary value of current transformer (CT) via front panel keys. The settable range for CT primary is 1A-9999A and 1A/5A for CT Secondary. This parameters are configured and programmed at the site only in first 15 minutes after entering into CT Primary or CT secondary edit mode and get locked as per MID standards

### Compliance to Standards :

National / International Standards are complied

Accuracy Standard : EN50470-3:2022

IEC62053-21, 23

IP for water & dust: IEC 60529

Plastic Flammability Standard: UL 94
