RISH EM 2340 measures important electrical parameters of Utility and Generator in 3 phase and single phase Network & replaces the multiple analog panel meters. It measures electrical parameters like Active / Reactive / Apparent energy , power. The instrument has 2 configurable optional outputs as pulse output for energy measurement or limit output.

Applications:

- Internal Energy billing
- Electrical load monitoring
- Sub-metering
- Genset, Test Benches and Laboratories

Product Features:

True RMS measurement:

- ▶ Measures distorted waveform up to 15th Harmonic.

Dual Source Energy Measurement as per IEC 62053:

- ▶ Independent Energy counter for Generator and Utility.
- ▶ Generator sense signal (10 to 60VDC/20 to 300VAC)
- ▶ Active energy (kWh), Reactive energy (kVAh), Apparent energy (kVAh) measurement.
- ▶ Accuracy as per IEC 62053-21, IEC62053-23.

THD Measurement:
